DB Lookup Application

Formatting Database

DB Lookup Application

You must first create a database in order to use the DB Lookup Application.

If you need to create a database, see the example below. It is recommended to use Microsoft Excel when creating a database. Copy & paste from Excel into a text document (in Microsoft Word or Notepad). Save the document as a .txt file, which will be used later in the DB Lookup Application.

There should be a total of four columns, matching the four lines on your KDC screen. Column A must contain barcode data.

The screenshot shows an Excel Online spreadsheet with the following data:

	A	B	C	D	E	F	G	H	I	J	K
1	040922	Nuts	2	100							
2	040924	Bolts	2.5	200							
3	040926	Scanner	3	300							
4	040928	Paper	3.5	400

The spreadsheet is titled "Excel Online" and has a menu bar with "FILE", "DOWNLOAD", "DATA", "FIND", and "COMMENTS". The active sheet is named "DBLookup".

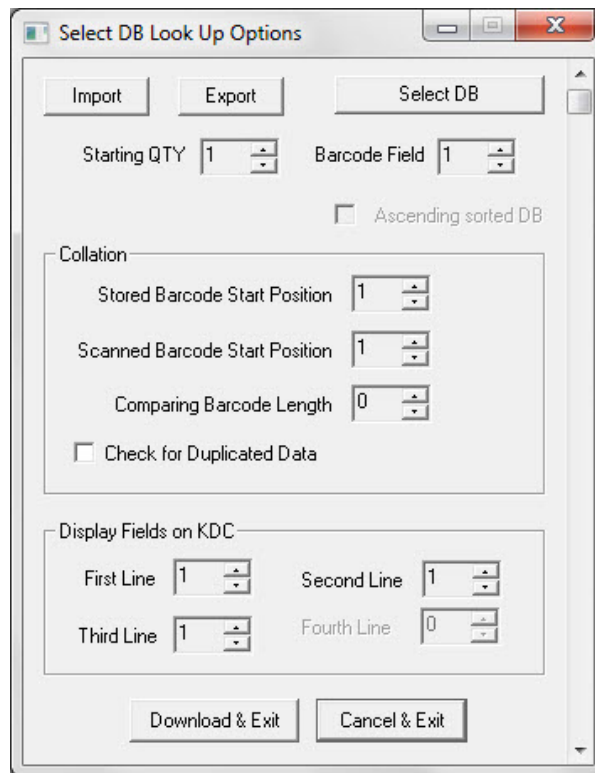

Creating an Application

DB Lookup Application

Connect your KDC to your PC. Open the KTSync application and navigate to Application>DB Lookup.

◀ Select the DB Lookup

◀ Select the DB Lookup & upload the .txt file (created prior) that will be sent to the scanner. If you wish to use the same DB .txt file for another scanner, you can "Export" the file and it will be saved for use.

▶ This section will enable you to adjust the settings as needed.

▶ Once complete, click Download & Exit to upload DB to your KDC.
