

SAMSUNG GALAXY TAB ACTIVE2 CART KIT

ITEM NO. 7170-0733

Specifically designed to work within the fast paced environment of retail

The Samsung Galaxy Tab Active2 cart kit is designed to be used in several different environments ranging from inventory management in the back room to personal shopping in the front of the store. The cradle allows the tablet to be securely mounted throughout the work day on the cart while also giving users the ability to still access valuable tablet features, such as the stylus, ports and camera while docked. The cradle is then docked to our Zirkona cart solution which features an extension pole and medium joiner, for flexibility and several areas of adjustment.
